

Alberta Health Services

Organization: Alberta Health Services

Technology Focus: P25 Recording, Eventide Technology

Duration of the project: 2015 - Ongoing SLA

Alberta Health Services delivers medical care on behalf of the Government of Alberta's Ministry of Health through 400 facilities throughout the province including hospitals, clinics, continuing care facilities, mental health facilities and community health sites, while providing a variety of programs and services. AHS is the largest single health authority in Canada and is the largest employer (117,000) in the province of Alberta as well as being the 5th largest single employer in Canada.

This is a project integration with Harris VIDA P25 where Cartel has supplied two NexLog 740 voice recorders and OTAR enablers with on-site factory installation support package. These were purchased specifically for AFRRCs P-25 System for AHS EMS Dispatch Services. The Eventide voice logging product was delivered in March 2015. We have completed the equipment install and commissioned this system. Cartel offers ongoing support to the system and in total, AHS EMS Dispatch has 8 Eventide Voice Loggers in 4 different locations around the province.
