

SHOWCASE CITY: HONG KONG

BTI Deploys DAS products
throughout HK

ASIA'S WORLD CITY ENJOYS WORLD-CLASS WIRELESS SERVICE, COMPLIMENTS OF BTI SERVICE

Vibrant and fast-moving, Hong Kong is one of the world's most dynamic cities. As both a global financial center and a tourism mecca, this metropolis requires reliable wireless service at all times. Hong Kong was an extremely difficult city to cover, however, due to the combination of its dense population (7 million residents plus 60 million yearly tourists), which causes high-capacity demand, and its abundance of towering, mixed-use buildings, which are notoriously hard to cover.

Many of Hong Kong's busiest skyscrapers, hotels, shopping centers and hospitals as well as its mass transit upgraded their wireless infrastructures with BTI DAS solutions, which solve both capacity and coverage issues, to provide seamless wireless service to Hong Kong inhabitants who are rarely without a smart-phone, tablet or laptop.

BTI Product Highlights

Our comprehensive suite of patented products fully addresses the current market for in-building and outdoor coverage enhancement solutions.

- Best-in-class amplifiers
- Indoor, mid-power DAS
- Outdoor, high-power DAS
- Supports 2G, 3G & 4G LTE (MIMO and SISO) and beyond
- Supports all common frequency bands used in global wireless community
- Mix & match modular architecture — 2W/5W or 20W/40W/80W in the same chassis

BENEFITS OF INDOOR DAS

As indoor mobile usage continues to grow, in-building wireless technology becomes essential for business to ensure the ultimate end-user experience. BTI has more than a decade of experience working with all types of venues around the world, including some of the busiest and tallest buildings in Hong Kong.

A BTI DAS solution:

- Extends coverage cost efficiently throughout the property, even in the highest-capacity areas, for guests & staff
- Supports multiple operators & all commercial operating bands
- Protects your investment — our modular product architecture allows you to start small & grow as required, or to add future bands as operators update their networks
- Uses just a single strand of fiber for a low-cost solution
- Enables the use of wireless building automation applications
- Allows for public safety communications on the same platform

SERVICE YOU CAN COUNT ON

BTI's goal is superior service — before, during and after installation. We offer design consultation, training, field services and always available technical support to ensure the success of your projects.

Wireless Coverage in HK
