

HOSPITALITY

Distributed Antenna Systems (DAS)
for Seamless Wireless Coverage

EXCEPTIONAL WIRELESS SERVICE AWAITS YOU

The hospitality industry relies entirely on customers being happy, with service and amenities playing an integral role in their satisfaction.

Today's travelers have smartphones, tablets and laptops to keep in touch with family and friends, conduct business, stream entertainment, and share experiences via their social networks, which makes wireless service more than an amenity — it's an expectation.

In addition to supporting mobile applications for their guests and staff, properties also must consider coverage for public safety communications and building automation such as lighting, door locks, motion sensors, and alarms which streamlines operations for cost and management efficiency.

However, until recently, providing reliable wireless service to guests, staff and the facility proved challenging due to high-occupancy (room count and events), sprawling properties, historic structures, specialty construction materials, and a diverse mix of facilities, such as guest rooms, clubs, restaurants, pools, retail stores, banquet halls, theaters and convention facilities.

BTI Wireless (BTI) in-building DAS solutions overcome these obstacles to help today's properties run more efficiently while keeping their guests connected, and happy.

Wireless Coverage for:

- Guests & Staff
- Building Automation
- Public Safety Communications

Types of Properties:

- Hotels & Resorts
- Convention Centers
- Casinos

BENEFITS OF INDOOR DAS

As indoor mobile usage continues to grow, in-building wireless technology becomes essential for the hospitality industry to ensure the ultimate guest experience. BTI has a decade of experience working specifically with hotels and convention centers around the world.

A BTI DAS solution:

- Extends coverage cost efficiently throughout the property, even in the highest-capacity areas, for guests & staff
- Supports multiple operators & all commercial operating bands
- Protects your investment — our modular product architecture allows you to start small & grow as required, or to add future bands as operators update their networks
- Uses just a single strand of fiber for a low-cost solution
- Enables the use of wireless building automation applications
- Allows for public safety communications on the same platform

SERVICE YOU CAN COUNT ON

Like the hospitality industry, BTI's goal is superior service — before, during and after installation. We offer design consultation, training, field services and always-available technical support to ensure your satisfaction, and ultimately, your guests.

Wireless Coverage Around the Globe

A few of our global hospitality projects include:

Canada

- The Westin Harbour Castle Hotel

Singapore & Australia

- Garden by the Bay
- Melbourne Convention Center

Hong Kong

- Gold Coast Hotel
- Royal View Hotel
