

OUTDOOR

Distributed Antenna Systems (DAS)
for Seamless Wireless Coverage

OUTDOOR WIRELESS COVERAGE

Operators around the world have successfully deployed BTI outdoor DAS units to rapidly enable dense capacity in urban areas, or to extend coverage across challenging terrains.

BTI consistently pushes the envelope for maximum output power, and power density (Watts per cubic litre). We provide convection-cooled solutions up to 40W per band, and active-cooled remote units up to 80W per band. BTI's modular design allows cost efficient "pay-as-you-grow" field upgrade scenarios important in today's rapidly changing environment.

BTI provides equipment for extensive outdoor DAS networks for operators in North America, EMEA, Asia-Pacific and Oceania.

BENEFITS OF BTI OUTDOOR DAS SOLUTIONS

- Best-in-class linear amplifiers
- Only single-band 80 watt solution in the market for high-power DAS
- Supports all common, worldwide frequency bands — including FDD and TDD formats
- Compatible with 2G, 3G & 4G LTE (MIMO and SISO)
- Delivers ultimate flexibility — modular architecture allows mix of 20, 40 & 80 watt remotes in the same chassis

Wireless Coverage for:

United States

New York

- Yonkers/Mount Vernon
- Manhattan & Staten Island
- Long Island

California

- Pasadena & Rose Bowl
- Santa Clarita & Thousand Oaks
- Inland Empire
- Palm Springs

Michigan

- Flint & Farmington Hills

SE Asia & Australia

Australia

- Sydney Harbour Bridge

Pillippines

- Dasmarias Village

About Us: As global experts in wireless communication, BTI Wireless (BTI) continually delivers innovative solutions that allow mobile users worldwide to experience reliable coverage in the highest-profile, highest-capacity and hardest-to-cover public, private and government facilities. BTI prides itself on its technology expertise, designing and manufacturing products that include high-performance power amplifiers, DAS, small cells, and other RF subsystems. Founded in 1999, the privately held company is headquartered in Cypress, California with offices across the Americas and Asia-Pacific.
