NexLog® DX SERIES
Advanced Recording Solutions

Your Full Ecosystem Recorder

Eventide Communications' *NexLog DX-Series* recorders are specifically designed for mission-critical environments, including emergency call-taking, dispatch, air traffic management, and more. These recording solutions capture, record, and archive all calls, video, and screen activity and provide immediate research, replay, and export capabilities. Their Linux-based operating systems deliver unmatched reliability, security, and scalability, making *NexLog DX-Series* recorders the most reliable and stable recording platform on the market.

Industry-trusted design, local deployment, and ongoing support

One hundred percent USA-owned and operated, with over 50 years of engineering and manufacturing excellence, Eventide's recording solutions are the result of over 30 years of mission-critical recording experience. Each *NexLog DX-Series* recorder is custom-built and includes ongoing service and support from your trusted local dealer.

MADE IN THE USA

All NexLog DX-Series software includes or has options for:

NexLog 840 DX-Series

560 Total Channel Capacity:
- 240 Analog
- 560 VoIP
- 240 Digital PBX
- 240/240 T1/E1
- 240+ P25
- 240+ DMR
- 4U Rack-Mountable

Platform Options

Eventide's *NexLog DX-Series* recorders cater to diverse IT preferences with three platform options. Eventide fully supports any of these options or a hybrid combination to meet your deployment and operational needs:

- **Hardware Appliance:** Purpose-built, highly reliable, rack-mountable recorders.

- **Virtual Appliance:** This software-only solution is delivered as packaged software and allows you to host the appliance on a platform of your choice.

- **Software as a Service (SaaS):** Eventide hosts this cloud-based solution in a public cloud and manages the operational aspects of the virtual appliance.

A single pane of glass

NexLog's DX-Series software, *MediaWorks DX*, enables the creation of a holistic view of incidents for instant recall, forensic replay, incident reconstruction, burn to CD/DVD/Blu-ray, NAS, email export, RDX, and more. This software is accessible via any web browser on PCs, tablets, and phones using industry-standard HTML5 technology. *MediaWorks'* intuitive interface offers a comprehensive view of all recorded communications, simplifying access and management for ultimate ease of use.
