

# Department of National Defence

**Organization:** Department of National Defence

**Technology Focus:** Voice Loggers, Eventide Technology

**Duration of the project:** 2002-ongoing

Cartel has provided different groups within DND with recording systems. The environment ranges from mobile ATCs to National Operational Centres and military base operations. DND has been utilising the Eventide solution since the early 2000's and started to replace their aging fleet with the new Eventide NexLogDX platform in 2016.

Upon winning the contract, Cartel not only delivered 43 Eventide Recording solutions, but also provided training for the technical team that would be responsible for deploying all units. Cartel continues to provide technical and service support as required.
